

DIY Guide On Narrow Under Stair Pantry

Tools & Materials Required

- Measuring tape
- Stud finder
- Level
- Screwdriver/drill
- Sandpaper
- Paint and brushes
- Drywall sheets
- Drywall screws
- Wood for shelving
- Heavy-duty brackets
- 3/4-inch wood strips (for shelf edges)
- Basic lighting fixture
- Paint tape

Step-by-Step Building Guide

1. Prepare the Space

- Remove existing wall if needed
- Clean the area thoroughly
- Check for water pipes and electrical lines

2. Install Basic Structure

- Put up drywall sheets
- Screw drywall into place
- Add a simple light fixture for better visibility

3. Paint the Space

- Tape off edges and fixtures
- Apply wall paint
- Let it dry completely

4. Install Shelving

- Find and mark wall studs
- Use level to mark shelf placement
- Cut shelves to fit sloped ceiling
- Install back supports into studs
- Add heavy-duty brackets
- Place shelf boards on brackets

5. Add Safety Features

- Install 3/4-inch wood strips on shelf edges
- Sand edges smooth
- Optional: Paint front edges only
- Leave shelf surfaces unpainted to prevent jars from sticking

6. Final Touches

- Test shelf stability
- Clean up the work area
- Allow everything to dry completely before using

The beauty of this project is its simplicity - you're making good use of space that often goes to waste. It took me a few weekends to complete, but the result was worth the effort!
